

C.E.M.N.G San Vicente de Paúl

Tarea: Creación de una Base de Datos en phpMyAdmin

Alumno: Johan Isaac López Amador

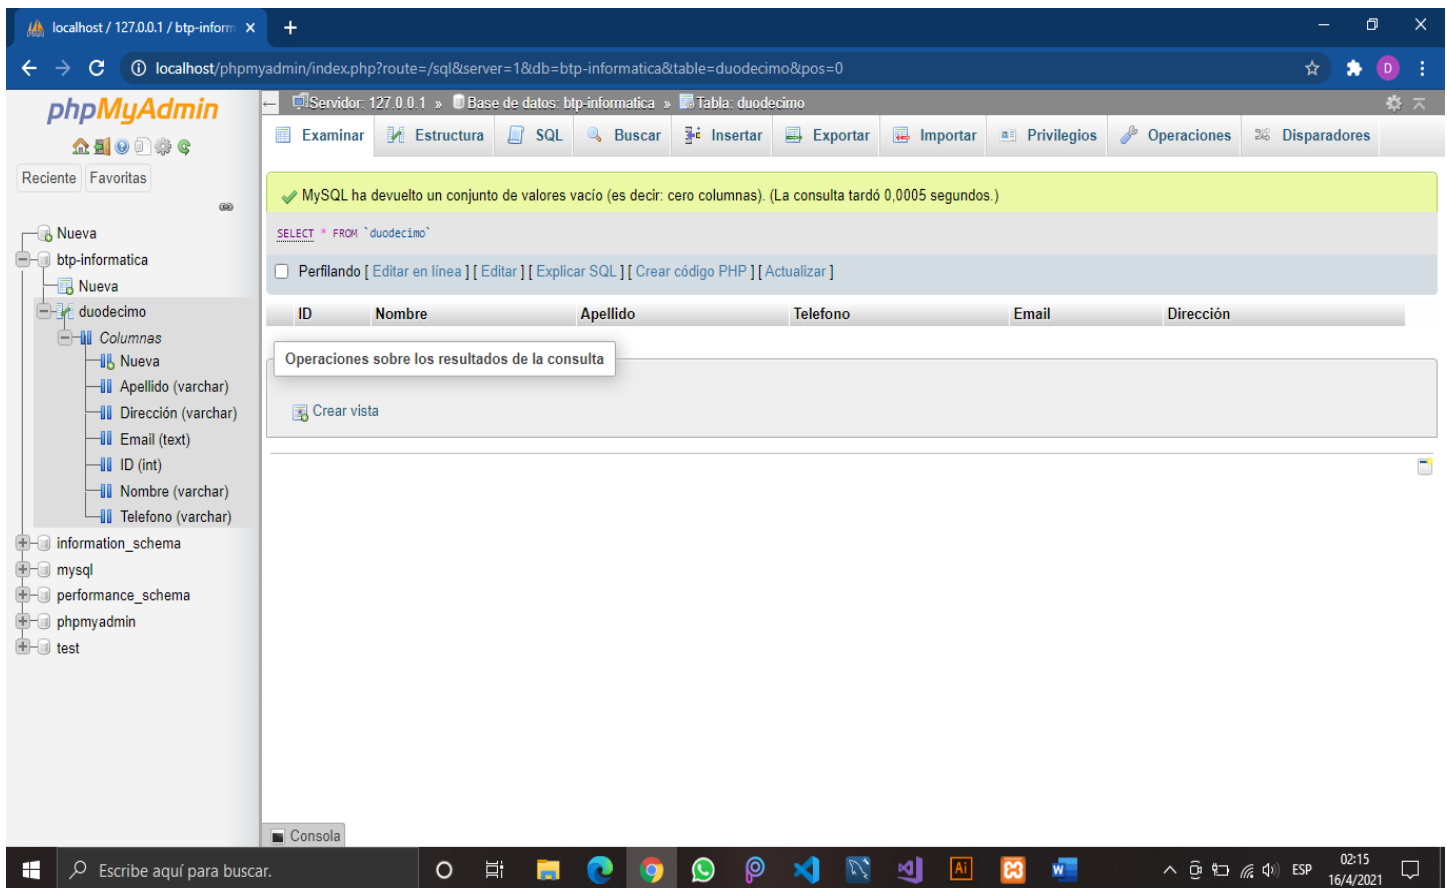

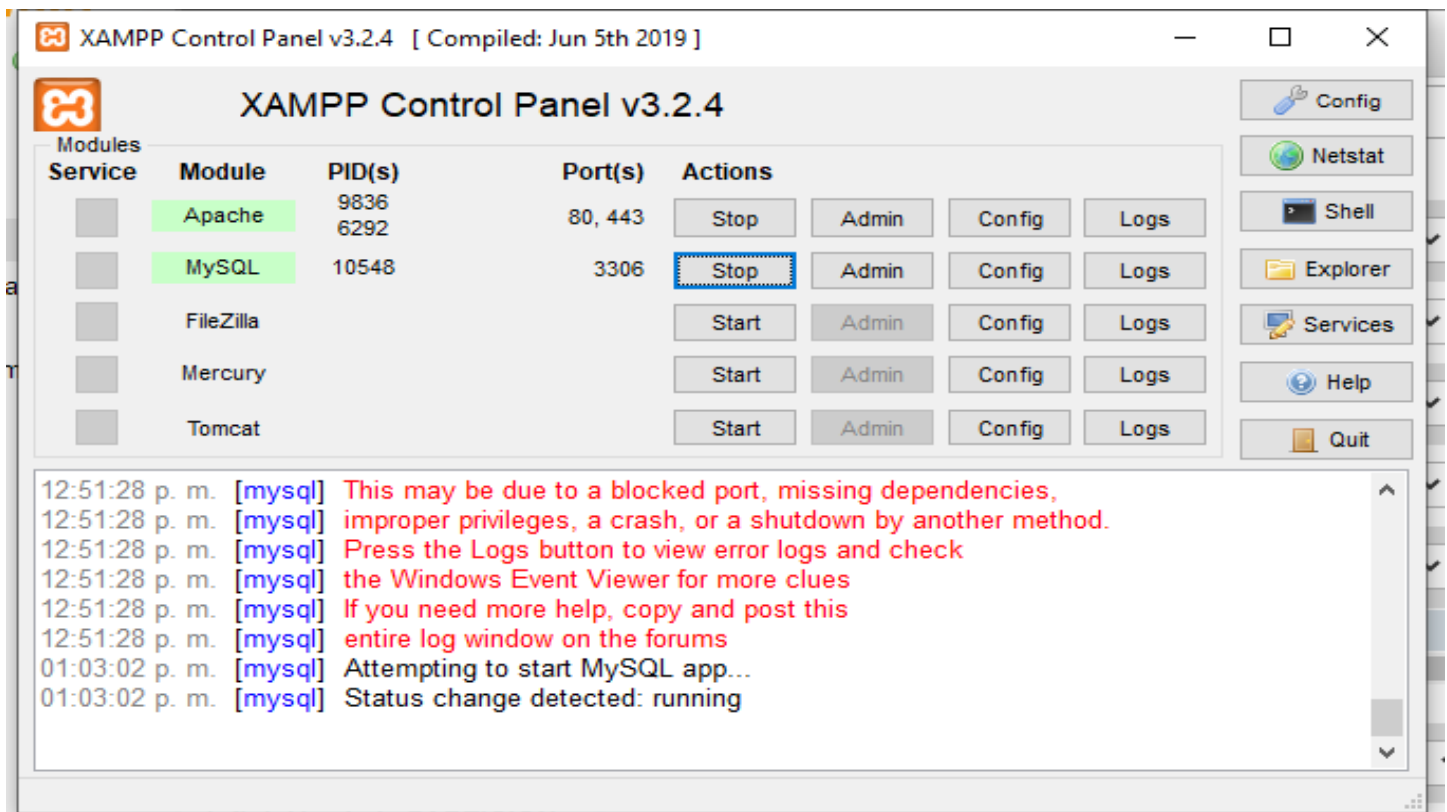

Materia: Diseño Web

Profesor: Maynor López

Grado: 12vo BTP en Informática

Fecha: 16-Abril-2021

Lugar: San Pedro Sula, Cortés, Honduras

The screenshot shows the phpMyAdmin web interface. The browser address bar indicates the URL is localhost/phpmyadmin/index.php?route=/table/structure&db=btp-informatica&table=duodecimo. The interface is in Spanish. The left sidebar shows a tree view of the database structure, with 'duodecimo' selected. The main area displays the 'Estructura de tabla' (Table Structure) for the 'duodecimo' table. The table has 6 columns: ID (int(25)), Nombre (varchar(30)), Apellido (varchar(30)), Telefono (varchar(12)), Email (text), and Dirección (varchar(60)). Below the table structure, there are options to 'Agregar' (Add) a new column, with a dropdown menu showing 'después de Dirección'. The bottom status bar shows 'Create an index on 1 columns' and a 'Continuar' button.
